About Me

I am a friendly, passionate, full stack developer from South Africa. Although my years in the workforce aren't that long, I have a lot of experience in many web-based technologies. I am always learning something new, working on one project or another. I am a fast learner, with great logic skills, and have a keen eye for design elements.

Experience

WEBelieveIT — Fullstack Web Developer

MARCH 2019 - PRESENT

- Contract work for The Delta Studios (thedelta.io), working on Priv (priv-io.com)
 - Building with React to build a Digital Privacy Management tool, using C#, ReactJS, and Postgres
- Contract work for SQN (sqn.world), building front- and backend apps/systems
 - 3G platform stack: KnockoutJS, SemanticUI, VueJS, Javascript, Nginx, Docker, Kubernetes, Jenkins, C#, Java, Python, jQuery, MySQL, git
 - 5G platform stack: VueJS, Bootstrap, Typescript, NodeJS, Codefresh, Docker, Kubernetes (with helm charts), MySQL, git (bitbucket)
- Work on TimeTracker (timetracker.co.za), both front- and backend
 - Stack: C# (dotnet core), Dapper, Javascript, VueJS, SemanticUI, Jenkins (Declarative Pipeline), Docker, bash scripts, MySQL, git (bitbucket)
 - DevOps role to manage our internal infrastructure
